

### Outpatient Radiology Services

Our radiology department utilizes the latest in digital imaging technology for MRI, CT, X-ray and fluoroscopy. We offer a wide range of exams such as head and neck, body, gastrointestinal and pain management with a specialized focus on orthopedic and neuro-spine imaging.

Images and reports are readily available electronically through our Picture Archival and Communications System (PACS) and the Radiology Information System (RIS). Physicians can easily evaluate your reports from their offices to the OR.

All FSH radiologists are Board Certified and specialized in musculoskeletal, neuro-radiology and interventional imaging. Onsite coverage is available Monday through Friday, 8:00 am to 5:00 pm. Evening and weekend coverage is provided on an on-call basis.

### FSH Partner Surgeon's Disclosure Statement

All physicians practicing at FSH are credentialed by Foundation Surgery Affiliates. FSH has surgeon partners (those with direct ownership in the hospital) as well as those affiliated with FSH. The partners are board certified and many hold faculty appointments at prestigious medical schools.

### Welcome to Foundation Surgical Hospital

Welcome to Houston's premier Specialty Orthopedic and Spine Care hospital. Orthopedic and Neuro-surgeons designed the facility to provide the very best care for patients from age 14 and up. Our campus has doctors offices, outpatient radiology and physical therapy all in one location to meet the demands of your busy life.

### Convenient Outpatient Physical therapy

Foundation Surgical Hospital (FSH) has a spacious gym on site for outpatient therapy. Our exercise equipment includes treadmills, weight machines, recumbent bikes and steppers. We also have modalities to assist with pain control - ultrasound, electrical stimulation, light therapy and traction therapy.

### Joint Retreat and Back to Health Programs

When you are scheduled for surgery, FSH will call to set up your pre-admission visit. Our professionals teach you about your procedure, pain control and hospital routines. Your tour allows for registration and gives ample time to answer any questions before proceeding to pre-admission testing (if required).

FSH doctors individualize your treatment to support a speedy recovery. We provide effective pain control and comprehensive physical rehabilitation in our hospital's healing environment.

Please meet us in the main lobby on the day of your tour. The hospital is located at 5410 West Loop South and we offer complimentary valet parking. You will be escorted to pre-admission testing afterwards.

### Back to Health

The Back to Health program and services provided by Foundation Surgical Hospital are appropriate for anyone who has back- and neck- related pain. Our surgeons care for the full range of spinal disorders affecting the cervical, thoracic and lumbar areas of the spine. Our goal is to relieve any anxiety you and your family may have before, during and after surgery.

### Joint Retreat

Every patient having Total Joint Replacement Surgery is eligible for our Joint Retreat Program. We encourage family members to actively participate from the preoperative phase throughout your hospitalization, recovery and rehabilitation. Patients who have a strong support system recover more quickly and have fewer complications than those who do not.

### Pre-Admission Testing

Please bring the enclosed forms with you on the day of your tour and testing:

- Medical history
- List of medications with name, dosage and time of day taken
- Recent medical clearance forms or results such as lab work, EKG and stress tests done prior to your visit

Depending on your doctor's orders, you may meet with the anesthesiologist at this time. Please keep in mind the entire visit may take a few hours to complete your pre-op teaching and assessment, necessary paperwork and the tour.

### Our accommodations

At Foundation Surgical Hospital we often hear, "If I weren't having surgery, I'd think I was in a hotel!" We want you to feel as "at home" as possible. All rooms are private and have a sofa bed for an overnight guest. Guest meals can be ordered for an additional fee. Having a great room and excellent care explains why many patients say they don't want to go home!

### Oasis

The Oasis suites are deluxe accommodations for the comfort and privacy of our patients and their families. The Oasis concierge provides individualized support for those desiring upgraded service and special amenities.

### International Program

Our International patients receive support services including appointment scheduling, language assistance, hotel, transportation and flight arrangements among other needs.
